SUMMARY

Frontend engineer, 10+ years, mostly React and TypeScript on remote teams in the US and Europe. Four of those years went to healthcare data platforms at IQVIA, working on large React apps against REST APIs. I go a layer down into Node, Prisma, and MongoDB when a feature needs it. Lately most of my own time goes into Effect-TS, mainly its error handling and concurrency model.

SKILLS

Frontend: React, Next.js, TypeScript, Effect-TS, JavaScript (ES6+), HTML5, CSS3

State & data: Redux Toolkit, React Query, REST APIs

Backend: Node.js, Express, Prisma, MongoDB

UI: Tailwind CSS, shadcn/ui, MUI, Bootstrap, responsive layout

Performance & accessibility: code splitting, memoization, SSR, WCAG, ARIA

Testing & tooling: Vitest, React Testing Library, Vite, Git, CI/CD

EXPERIENCE

Software Engineer, **BauCheck (Remote, contract)**

May 2025 to Present

- Rebuilt the frontend of a Laravel app on React, Vite, and Inertia. Roughly 25 screens migrated.
- Split a legacy codebase into feature modules so the team could work in parallel.
- Wrote the REST layer between the new frontend and the existing backend services.

React, Vite, Inertia.js, shadcn/ui, Node.js

Frontend Engineer, **ManAI (Remote)**

Sep 2024 to Mar 2025

- Built the MVP frontend for a restaurant menu and ordering platform. Shipped in 12 weeks.
- Handled live menu updates and the ordering flow, including the state model for cart and order status.
- Worked directly with the founder and designer on scope.

React, Next.js, shadcn/ui, InstantDB

Frontend Engineer, **Adeva (Remote)**

May 2020 to Jun 2024

Placed as a contract engineer with IQVIA for most of this period.

IQVIA, healthcare and medical standards platforms

- Built and maintained React applications for ASH Datahub, the American Society of Hematology's research data platform.
- Integrated FullCalendar for scheduling and eCharts for the reporting dashboards.
- Refactored API modules with Redux toolkit, cutting load time from 6s to 2s.
- Worked alongside backend engineers and designers on shared component work.

Adeva, internal

- Moved the company marketing site off Laravel onto Next.js with SSR. Organic traffic changed by 70% over 3 months.

React, Vue.js, Next.js, TypeScript, Redux Toolkit, React Query, MUI, eCharts, FullCalendar

React Developer, **Qoreboard (Remote)**

May 2019 to Feb 2020

- Built an employee management dashboard for HR data tracking and reporting.
- Wrote the shared component library the rest of the app was built on.
- Connected the frontend to Node and Express services.

React, Node.js, Express, Bootstrap

Frontend Developer, **WeAreDamage (Remote)**

Sep 2017 to Jan 2019

- Shipped 16+ client web and mobile projects on Angular, Ionic, and WordPress.

Angular, Ionic, jQuery, WordPress

Frontend Developer, **RedQ (Dhaka)**

Jul 2015 to Aug 2017

- Built HTML, CSS, and JavaScript templates sold on the Envato marketplace.

JavaScript, jQuery, WordPress, Bootstrap

PROJECTS

- **Cirkle.** Social platform features in React. cirkle.com
- **Eduly.** Ionic mobile app and landing page. eduly.co.uk
- **English Cut.** Storefront UI for an e-commerce platform. englishcut.com

EDUCATION

BSc, Electrical and Electronics Engineering

Rajshahi University of Engineering & Technology (RUET), 2009 to 2013
